UAA Criteria Evaluated:

- ☐ 1-Natural Pollutant Sources.
- ☒ 2-Natural, Ephemeral, Intermittent or Low-Flow Condition.
- ☐ 3-Non-Remedial, Human Caused Condition.
- ☐ 4-Hydrologic Modifications.
- ☐ 5-Natural Physical Features.
- ☐ 6-Substantial, Widespread Social and Economic Impact.

Use Determination & Recommendation:

Has the use existed since November 28, 1975? ☐ Yes ☐ No ☒ Unknown
Comments:

Is the evaluated use attainable? ☒ Yes ☐ No

Comments: The UAA was conducted in June, 2005 and no uses were observed at the six sites evaluated. Evidence of human use (tackle box and tractor tracks) was observed at two different sites. The stream met both average and maximum depth criteria at two sites, and the maximum depth criterion at a third site. Because the stream meets the depth criteria and evidence of human use was observed, the committee recommends retaining the WBCR designation.

Committee Recommendation: ☒ Retain Use ☐ Modify Use ☐ Remove Use ☐ Inconclusive
